Work for television or cinema can be adapted for theater.

Genre fiction for ages 18+ and not an expensive cut thing

it's something about human needs. that's why it has to be

humorous.

The dust-free laundry room

It is a brothel and a neighborhood laundry. those are two

scenes on the one hand what happens in the brothel and on the other hand what

happens in the laundry room. Then the owner of the laundromat who comes by

bored at night with the noise of the machines and with their

computer in bachelorhood with flirtations of a whore from the brothel.

Just when the laundry enters an economic crisis, his brother comes to

the laundry to the owner and tells him to help him and that he will pay

because he gives him a space to sell cocaine and the brother gives in and

starts his illegal business with motorcycles that go in and out of the car wash

at all hours and with customers who go and get confused and the people of the neighborhood

speak out of suspicion After a while I searched for the police and

the investigators cannot give proof since in the brothel there were

a high-ranking person who frequented him and was in favor of

legalization then we can see a whole panorama in the scenes

imagining dialogues all in a comical way because in the end Dan with

This seller's brother has the laundry but they can't

arrest because cocaine is already legalized. The paradoxical And where

you have to look for the comedy is that it gives laundry it's called clothes

no dust. This is written, that is, this idea for scriptwriters who

capture the scenes where sex is present where technology

is present where the neighborhood is present and where drugs are

present and not to make a drama out of all this, except as a torrent of

make it funny for the audience. About everyday life and about everything

that they always put the bad guys in that position to look for mischief

so that the viewer feels involved in the work and to

end prejudices. It can be done in series like gas tankers with the

final purpose of preparing people for a

legalization of cocaine. And let's see if there's any left in the laundry

dust free clothing

Keep in mind that this genre sells a lot

Daniel Triumph

(I have an identity problem)

The sales theater both at door-to-door levels up to the

higher levels of social networks are based on reaching the conclusion

of the assumption and for that the customer in the sales theater is asked

a few simple questions before of course the seller introduces himself and

That's where the seller-buyer relationship begins, then from there

The seller who is now going to sell with a payroll is going to have a series of

questions first at the resume level to the buyer and the

seller will have the mission of retaining in his memory the data provided

So when ideas are made, they have the ability to enter

empathically using imagination in buyer life then

When the seller enters that phase, the product or service is given to

selling remains in the background at the unconscious level of the seller and

What the buyer does is start giving a survey where

the tips of the questions will all be within that curriculum

imaginary and the survey is therefore done alone. Now we have the

mission sellers to find when the alleged buyer names

paradoxically what was supposed then when we have this word

we know that if the buyer says the word course we know that he has

lied then without waiting much the seller has to give to

choose another product or other services then the customer feels

well with the ego And that's when the sale is finished when the

customer at that moment makes the decision to buy because he has

a feeling of guilt has arisen without realizing it and he thinks he is deceiving the

seller when he buys what he supposedly The seller could not

then sell your trap The buyer's trap is still valid AND

Guilt disappears and the sale is made.

So when the seller learns to improvise with one or more

people what is there to teach in this theater between person and

person and with others learning around and then exchange

and another theater of sales is made until the art is well learned. Is

a simple training that searches the other for the word supposed

because of course, as I said before, it was cheating and nobody wants to be

discover the traps then there The seller as I already said is who

grants the decision and with a form it is easier to do it

buyer and seller And then this is how marketing is trained to the

new generations who wish to enter the world of non-aggressive sales

and let's say that the assumption can be many things and that is discovered in

the theater because even an assumption cannot be a yes in a period of

determined time. Then there is a follow up which can be learned in

the same theater of its position towards the buyer since we have all

the data that we are going to write down after finishing the sale to

occasionally sell to that client and this can be improvised or

do in training groups during the week without stiffness with ease

and with great flexibility and thus we managed to make sales of the

theater of course Always keep in mind and put a lot of

attention when the client says supposedly because there is the key

and the way to the sale because it is where another product is offered

and the customer feels empowered to choose.

Don't touch the 102

Terror

The format is about a group of friends having fun playing

Apartment bells when leaving the Liceo.

It is set in a cloudy and inhospitable landscape in which inside

of those bells lives a man who becomes a beast and that each

every time the doorbell rings he opens the door not like all the other neighbors

what they fear then when the door opens he attends them and makes them

pass and they always try to rob him so he asks them to please

check if the doorbell works and then he turns on an electric key

and when they are about to play 102 they are electrified and become

monsters or zombies and enter one of the house where a

little girl who leads them one by one to a pit full of spider insects

dark cockroaches where there is a dovecote and cats

black and then the little girl makes them jump into the well and then they fly

the pigeons and so they die between skulls successively every time they

they ring the bell then the second scene would come, which is a teenager

waking up from a nightmare dream like it was all true and

he is relieved to have woken up safe and sound And then

he sets out on his way to the Lyceum and the teacher who was waiting for them was

the monster turned into a human being alright and when this arrives

adolescent who are always different and change because they are

many ask this teacher that he is one of the other friends who is not

They went to class and he always tells them, remember, don't touch the 102

and there comes a heart attack and the adolescent or the

Teen.

That is to say, everything is simulated as a hoax that it is true for a

part and then the viewer feels the relief that it is a dream and

then the terror is that it was all true and that uncertainty remains.

Thanks for making it. It is a format for television as is the call.

Overpopulation on Mars

After a long battle there is no habitable place left on earth and its

inhabitants are going to try their luck on Mars after leaving the earth

uninhabited media competes with famine with humans eating garbage

this group of two billion humans embarks on a journey towards

the unknown doing it is known if they can breathe on another planet and

someone told a woman who came from there that they could survive

in all the planets that there is oxygen, you only have to subtract it from

the earth and that was how to start an adventure in the solar system

first they started with the less dangerous planets such as Mars the

red planet there the battle began the martians persecuted the

humans they were 10,000 against 2000 humans and that was where the

humans began to do less until they learned the weakness of

the Martians and began to destroy them and leave them in places

uninhabitable like Indians or like monkeys in shelters and then began the

fight on Mars but from humans the Martians begin to revolt take

the ships and there is a super population on Tuesday and then from this super

population begin to leave ships to all sides of the solar system

less mercury and Venus that were very close to the sun although it is seen

reflected a little at that time And that's when they decided

return to earth when they returned to earth they found a planet

beautiful but desolate and that's where the children of humans who

they had been Tuesday of that super population of 30,000 million

people on the red planet began to escape to earth

again and the earth received him with a big hug and began to be born

a new planet a planet where there is no destruction of the

violence a peaceful planet full of great opportunities but what

happened they came with a radioactive wave and little by little they died

until which scientists found the vaccine to solve it and this

was that 500,000 humans were left on earth in a very

far away that no one knew called the spirit of the shelters And it was like that

where there engineer built their ships for space and

they began to leave because of the great plague and the great misery only remained

some who were left in the fight in misery in the class struggle and

then they began to shoot ships towards the universe and began to

find planets and humans became friends in the

planets of the aliens by recordings they had left and

received very well they had humanoid species and had been here in

the earth and had left for the same reasons the pestilences and the

wars and human struggles And then when they found your group

of pacifist humans managed to make alliances for the good of all of

technology and advancement began to mark humans transhuman after

his hand and they also began to love each other between humans and aliens and

began to do a different daring than anyone before knew in a sun

far near Lucero and far from the sun that there were 20 planets and a thousand moons

and kites passed by every two months and there was an abundance of templates

abundance in food and abundance in everything that can be called

to stock up and humans on earth being left eating

pre-made pills managed to survive for a few months and

then they all died for those super populations Mars the humans

they spoke to the aliens about the evil that was happening on earth and

They understood that it was not the cause of humans, it was the cause of a force

superior that dominated him from his birth then began the

expeditions from that planet so far away to human beings towards the

land and understood that the one who had inhabited not mom was responsible

from such genocide they began to leave far away and found the ships

with ships at war and saw this phenomenon as normal but they were

animals animals that were at war all against all and then

they said that the evil of the earth was not so bad but in those places

There was no betrayal or deceit, it was all a struggle to be able to stop

a universe for each King or here to God or for each Zeus of the

planet and they all went together and fought in ships until they passed

through the earth almost burning it and the few humans that were on the

earth understood very little as soon as they saw us pass by in a comet with

a telescope and then over the years they managed to answer that

instruction sending a missile to the moon and blowing up all the

lunatics and then they got rid of the madness and slowly started

to arrive in ships towards the earth they began to cultivate it and that evil that

there was on earth a strange path disappeared and humans

they began to be brothers and
thus the kingdom of the universe
was made with the

other universes peacefully with
love and in peace and without
betrayal that was

what humans did better and aliens
for a

way to call them that they were a
species of each animal managed
to have its

subsistences and their place
within the United universes that
made

this world far from being the
center and achieved technological
unity

satellite and be all United for the same cause as they had been

150 years ago, human beings lived for another 3,000 years in peace.

After 3000 years all the species began to mutate among all

species including humans and the inhabitants of the earth

in a species called richer and the richers did not come out at all

peaceful in this world having history and technology at their

scope to see how to conquer other universes was so

began to destroy the kingdoms and the universes taking advantage of the

stars and comets in super
powerful ships the most powerful

they could have imagined and
they fought so hard and they
fought so hard that

were the most feared of these
galaxies but there was a man a

man who could live many years
many years because he had a gene

of longevity to the chemist and
was the one who commanded the
spaceship of

the united galaxies of the united
universes began to command
along with

the 19 disciples of him a long
journey to totally destroy this

cursed society that the only thing that had left healthy was the earth

and to Mars but the survivors only wanted to go to Mars

So they all went to Mars and there were already 450,000 million inhabitants

and there was a super population on Mars And then they started again

humans who were the weakest to take ships to earth and

all this happened after 3500 years at 4000 years the humans who

inhabited the earth were unaware of what had happened 500 years ago

back only the history books knew they didn't even know

that there had been ships nor that they had gone through the universe and nor

even knew that Mars existed was something very strange because through

biotechnology had the psychiatrists of that time erased from the

memory everything that could be imagined so they became again

humans as in the year 2000 while great intellectual sages

they were preparing to know the origins they said this is a game there are beings

supernatural that play with us and when they want and they

get tired of playing they don't kill or we die and this idea was the concept of a

long-awaited reconciliation which made the sun shine very

strongly managed to conquer their dreams again and lived together

to the animals calmly since it had subsisted in the book

sacred of humans the food that had to be eaten that was a

pill per day and it has been his hand they began to live 250 years and

they lived so long and so happily that they destroyed the ships while for

at night it was seen that people from other worlds visited them

they put UFOs and that they named them ufo without knowing that in

those inhabited ships were aliens and humanoids that in

that time they had forgotten but that they existed but we did not know

nothing of them and some believed and others did not And that was where the

new civilization on earth to find a technology that

understand this phenomenon is to write the books and things were seen by

television and said that there were three types of approach that

everyone could see them and of course because they were all enemies because if

were friends they would be close to us humans so when they came

to deplete the earth becoming lizards ate mice

they made it look good but they
were really cursed but there was a

falling in love with these lizards
that disguised themselves as
humans and came out

a hybrid and a human of that
marriage what the hybrid could
not

survive and the human yes and
thus began a different world
where

then the moon managed to exist
and everything as we see it today
calm in peace

and according to the established
norms of our ancestors and so it is

the world friends. Then the human being became extinct and left the legacy to

dogs and cats and they made the world just like the beings

humans And it all started again when they discovered after so many

wars there were aliens on tuesday and it all started

successively the same does saram battle of the universes and of the

galaxies as at the beginning of this work that I am commenting on and that everything

the earth ends again until another successor is left who knows

who will God be?

The first rock

A long time ago

a man worked

In a restaurant

she knew him well

he he had been a boy

One day the restaurant closed

and they put another

under another name

and so this young man

He kept hanging out with him

because he was

In the passage of the way

One day this boy went to the bathroom

Remembering his work in that place

And he suddenly passes

That he sees the other boy come out

From the storage next to the bathroom

The new waiter was carrying a locker

The old boy gave him a boost

To the door with a very subtle foot to help the new boy

it will pass without difficulty

But there was a misunderstanding

The new boy thought that the old boy kicked in the door

So the old waiter was fired from
the restaurant

A gesture of kindness can become
a stone for another

when the other was only kind

So at the beginning of civilization
there was great confusion.

The first rock

did not throw

The first rock

it was reached

that's the confusion

What exists today

The two acted with love

the two worked

But that's where it started

human rivalry

that reigns our times

We have to go back

To think

that no one throws stones

Or not throw them directly

The first stone was

a gesture of love

The second was the rumor

And we will like life more

and we can

together sing

The song

of joy

now we know

the way back

who cast the first stone

Nobody

There was no first stone!!!

There was confusion simple
confusion

tours

The album you put out doesn't have to be the best, it just has

There must be a song that leads you to the promotion after finishing the

promotion what your friends like planning events

but unfortunately we live in a small country and there is not much of a market.

Now if we manage to make ourselves known at all levels by playing for 50

people in a Plaza for example and on that same beach we played in another

bowling for another 50 people and so on we can do it too

make known and play for a thousand people but it does not end here you have to go

planning if there is better recorded material because it can be

sell and make big shows to sell records and get paid

copyright and now the awards are given atril the awards that the

people choose that is detailed on this page we managed to end the

misery that affects a large part of the musicians. And they will see many

musicians who are going to want to do it and you have to go making concessions in

different countries with big companies like Sony music in my

music and other records and after all that comes the Latin Grammys.

So if you are young if you have the ambition if you have friends who

support, do not waste that situation because later it will be difficult

that it be given to you so you have to assess before that starts to eat you

bug of misery that is pulling you anywhere for that

there are managers and now with the viralization on social networks

it is easier to sell tickets are things that were explained.

Be a radio bowling corner subway bus musician

etcetera you will always have the possibility of going from here to the

corner of origin bowling alley or from theater to theater increasing

the public and selling records and stopping a bit to rehearse the

songs and also do not forget that each town has a musician

that stands out and what is convenient to invite him to be a great

show amusing people and make your career always like

you want your music your interpretation what you want to transmit without

neglecting that the people who follow you will always follow you and so with

that support for upcoming performances to sell tickets for your

shows in the malls and thus tourism is also

finds out that you are in that place and they are going to see you, that is to say, in this

situation any musician who has only one recorded song

Today it can travel throughout Latin America and also the market

North American and European of course and I'm talking about Latin music because

many musicians are not informed of this and spend their whole lives

sending material to the radios without a project made of shows and

of everything that has been up to now but then what happens in a

country where there are 45 million inhabitants and 30,000 buy the disc

o 40,000 people is a fairly high amount plus what you can

collect royalties and what you can sell on the internet.

Also, as I said, you can do it at a quieter, more intimate level.

play for fewer people and not be or sound so crazy and

always give space to other musicians so that they can develop

those also as opening acts and there create links for that same cause

people drink more with the artist when they pay for the ticket because they

feel entitled to have fun and if you don't pay for the ticket you have

right to get bored talking to the person who was and let's not forget that

nowadays there is marketing and at first maybe when you are 15 16

and 17 years old you will like the clubs the campsites and maybe you will play

free for your friends what is worth keeping the memory every

those experiences to later translate them into music and knowing that

fashions change every six seven months the good thing is to change too

records and mainly to rehearse and that for that you need money and

in the studio, as Paul McCartney said, that is, it is not outside, you do not have

Why find out what you are creating or a space in the house of

some isolated compadre can start. So while I'm

rehearsal process occurs the musician has the solvency of having done the

tour earlier then he has enough money to make a better

tour and get the best record but it's not a horse race either

to see who is the best but also if you are a professional musician

you are going to take it as a job and that is a record three five years and

recording for other formats for example digital cassette that is coming

now and in a team to type cassette as at one time it was recorded

everything on vinyl and how it was recorded on CD and before on cassette or tapes and what

last streaming.

Knowing all this, what has to be clear is that it is like a

business you buy 10 lighters and with the money from half invest

to buy more lighters and with the other half you live and that is given

all business areas and you can also be in my position or

you can form your own position that depends on each person and what

that touches life. I'm going to put together a song badly sung by

of course they will see the panorama better and if they want to sing it better

because my voice does not give no for more. So after all this move

the atril awards will come, which will also benefit the

radio record intermediaries and so on.

the project

It is a mentoring job for credit projects and with high

profitability to the state by the entire population that has a

project for the sustenance and personal growth and that of his family.

Entrepreneurs are called by the invoice of some state entity. HE

meet for a day in established places that are public for

hold meetings.

The mentor answers to the government and a group of accountants, economists

and write us public. (Who are the ones who see the viability of the

project) while the mentor makes the necessary adjustments. (It is the one that

gets the cheapest credit)

All credit houses as well as payment networks and credit cards

collections will get the job done faster and more efficiently.

Then the group begins to work, some do one job, others do another.

work but still go to meetings to exchange

information both with the mentor and with the group.

The more mentors the better since the project wants to reach all

the areas of the country and that way if you want to put a store in

working people will be able to do it. And start to grow and pay the credit

awarded. Then what you do with your money will be what makes everything

dealer.

The mentoring will have a personal savings account (each mentor) in

rotation to ensure the possible bankruptcy of the entrepreneurs apart

from your personal account for your debtors

And best of all, all the groups will be working together in

different parts which will give the country a very high growth in

foreign exchange. Plus all the products and services that are in rotation and

the circulation of money. So also the credit houses and everything

close to receiving projects can work it, that is, the sector

private and houses that want to do it online (because

need) and thus form groups with projects as well. From

Now everyone will have the possibility of development, even if it is for a

Pizza shop. The guarantee is that the contract will specify that if

If you do not pay, you will not be able to enter the project again.

Even if a mentoring project is done, you can also access the

government loan with everything explained above. (Besides

many will be required) Approximately one mentor per town. or a

mentor per page. Money and time are given so that people

Work calmly so that things come out for you. Also in the same

groups are learning to do new projects. and it can be done

a (new) course at the university of work. (How to create projects

viable)

What must be achieved is that each one does the best that he knows how to do.

And new calls can be made every few months with the same

mentors or other new mentors.

Ultimately all this becomes an industry for the country and global.

In order for everyone to know, an advertisement will be made to

those who wish to work in web groups. and the expenses

administrative will come out of
the SMS of the primary forms.

Luck smiles on you

It can be a work for cinema
adapted for the theater as well.

This is the story of the young girl
of 19 20 years with a father

hostile that she brings home when
she is pregnant.

So she takes refuge with a man
who is the father of her child and
who

he leaves her alone in an apartment with no money and she has to see the

alone after the child is born.

So she had very little money left and she went to the casino and lost all the money.

silver and the son was cared for by a neighbor so walking along the boulevard

because she did not have for the ticket she meets a man who already

she had seen in the casino and he stops her car and opens the door for her and

she says she comes in and she had no choice but to go upstairs and have a drink

coffee.

Then this man meets the child and they form a couple and he

he begins to breed but one day she asked him where she came from so much

silver that he gave her and he after doing a love scene with her

she confesses that he works as a con artist which results in a break up.

So she travels with her son to Buenos Aires with the money she had.

her to take luck and she gets a
good job although she runs with
the bad

lucky to have gotten into debt
before with credits and she begins
to have

love affairs with the people in the
office and little by little it is
becoming

popular and then one day they all
go to a party to sing karaoke and

she stands out where she is seen
by a producer and where he
invites her to record his

simple where she becomes
famous and rich.

Meanwhile, her son continues in Uruguay with her studies and she

sending him money to support himself.

Meeting her grandfather in a high society villa and living well.

One day the son goes to a bar and strikes up a conversation with a man and

it turns out that he was that man the swindler who had become

billionaire and recognizes the boy when he tells him the name and

she starts to help him and then the boy realizes who that was

person and her mother returns to Montevideo and calls this man (

after having been imprisoned) and he confesses that he does continue

cheating but doing good, that is, erasing the credits of the

bank accounts of the most needy as a kind of good

luck.

She, very moved, is going to live in a penthouse in little towns with this

man and his son and begin to delete accounts of people who told him

they apply, that is, they get into the banks and delete the accounts living

a happy life with a lot of luck that life gave him returns to the fifth

of her father make peace with this man and her son and begin

a happy life full of pleasures and she launches her first

records and does shows and the man marries her and stops

scam and her son becomes a lawyer and there they begin a tour of

Montevideo and Buenos Aires and her son leaves for Spain and she

she writes with her son with a very good future and then that's where

They lived happily with many friends of what the office in Buenos Aires did.

Aires that supported her at all times and ends that man who had

scammed tells her wait wait I forgot something and she looks at him

sideways and he tells her wait I have to do a final job and

he takes the computer and deletes all the credits and she is left without

debts and then this man becomes a moneylender and they get married and live

happy for life.

The film ends on a beautiful country landscape hill in the sun

with trees and well-cut grass away from the city and noise

playing golf and laughing for not knowing how to play. And in pointing to her

in front of her son and she laughs and says luck smiles at her.

Future Statistics Center

It is an undertaking for the government house that marks it

a law for all the governments of the country.

What, for my part, must be done is to form a statistical center

future this what does it mean to prevent evils how to be the drought that

we are going through environmental problems epidemiological problems

example and this is about making calls for governing aggregates and

thus provide information so that in the future it is possible to deal with the

problems and crises experienced by the next governments.

It is thus that delegates of the ministries of the pit cnt for the

also relegated workers of meteorology also delegate of the

Faculty of all subjects have you to deal with issues that

They can be valuable information for the development of the country.

Also parliamentary delegates and municipalities with their

respective councillors.

In an environment where everyone carries relevant information with the function

determinant to solve problems in the short and long term and also

the proposed solutions that will be delivered at a table where

all delegates will make a summary and return it to everyone for

the viabilities and thus in this way make effective or more effective the

material that the government has to make a government that has the

sufficient information and valid information by people of high

positions so that the population is calm and satisfied with the function

that the hierarchs fulfill.

Summaries of the report can be sent to the press and thus

make the information received by the population more accurate and

this way to prevent the error with the certain thought and the security

that we all deserve because all that separate information

generates inconveniences to govern instead having the information

first hand, it is possible to govern from now to the future with more certainty by

example if there is going to be a drought or if some people are coming

epidemiological, to give just one example.

Now it is up to the authorities to decide.
